PROFESSIONAL SUMMARY

Backend Software Engineer with 3+ years building and modernizing enterprise vehicle-claims platforms in C# / .NET at Solera. 4x Star of the Month awardee. Currently leading the cloud migration of a document-extraction service and an Azure AI pipeline that automates data extraction from estimate templates. Core strengths: REST API design, legacy modernization, high-volume file processing, and production incident response.

TECHNICAL SKILLS

Languages: C#, SQL, JavaScript, HTML, CSS, XML, XSLT

Backend: .NET, .NET Core, ASP.NET MVC, Web API, Entity Framework, Windows Services, IIS

APIs & Integration: REST, JSON, SOAP/XML, Postman, OnBase (Hyland)

Database: Microsoft SQL Server

Cloud & DevOps: Microsoft Azure (AI services), Rancher, Git, GitHub, Windows Task Scheduler

Frontend & Mobile (projects): React, React Native (Expo), Node.js, Vite, Tailwind CSS, Firebase, Socket.IO

Practices: Multi-threading & parallel processing, unit testing, legacy modernization, production support (24-hr SLA), client onboarding, AI-assisted development (GitHub Copilot, Claude Code)

PROFESSIONAL EXPERIENCE

Solera Holdings

Bengaluru, India

Products: HyperQuest (vehicle claims management) and APD (auto physical damage assessment)

Software Engineer II

Aug 2025 - Present

- **Leading the cloud migration** of the platform's document Extraction service and implementing an **Azure AI pipeline** that auto-extracts data from diverse estimate templates, improving extraction accuracy and reducing manual review.
- Led the **migration of 72 Windows Servers** with a 4-engineer team, achieving **zero data loss** and near-zero downtime across the HyperQuest platform.
- Designed and built a **REST API integration** connecting OnBase (Hyland) with HyperQuest, **replacing 10 legacy VB scripts** and eliminating a third-party dependency from the document workflow.
- Resolved **high-severity production incidents** (NTOs, 24-hour SLA) by live-debugging on NOC calls and proposing fixes during the call, minimizing user-facing impact for enterprise clients.
- Built a **Windows Service** that detects and quarantines corrupted PDF files before processing, eliminating a recurring class of downstream pipeline failures.
- Drove technical **onboarding of 5 enterprise clients**, owning integration, configuration, and go-live support.
- Improved **logging and observability** across platform components, reducing troubleshooting time and mean time to resolution (MTTR).

Associate Software Engineer

May 2023 - Jul 2025

- **Modernized a legacy Internet Explorer + ActiveX application** to run on all modern browsers and rebuilt its UI end-to-end, extending product life and improving performance and accessibility for every user.
- Re-engineered two Windows Services with **multi-threaded, parallel-session processing**, file-count tracking, and job-completion gates, cutting end-of-day batch processing time and increasing throughput.
- Built a fully **configurable data-retention engine** (company-level holds, claim-based filtering, claim-number extraction from filenames and XML) that safely automated cleanup of **9 TB of file-share data** with CSV audit logs for every deletion.
- Migrated claim creation and outbound document delivery for **2 enterprise clients from legacy SOAP/XML to modern REST/JSON APIs**.
- Implemented **TXFB photo consolidation**, merging multiple claim images into a single outbound PDF, streamlining client document delivery.

PERSONAL PROJECTS

FarmRent: Farm Equipment Rental Platform | *React, Node.js, Socket.IO, Razorpay*

- Peer-to-peer platform for Indian farmers to **rent idle agricultural equipment directly**: location-based search on Mappls maps, **Razorpay payments** (UPI/card/net-banking) plus cash-on-delivery, real-time Socket.IO chat, verified ratings, and owner dashboards.
- Built a **Farmer Hub**: state/district-filtered government schemes, 7-day weather advisories with **25 rule-based farm alerts**, live mandi prices from data.gov.in (Agmarknet), and a **KYC-verified marketplace** (license / GSTIN / Aadhaar) with 2% platform commission.
- Automated daily **cron notifications** (severe-weather alerts, mandi-price digests) and real-time order updates; **localized in 7 Indian languages**.

FitMate: Diet Planner & Nutrition Tracker (Android) | *React Native (Expo), Firebase*

- **Offline-first Android app** generating personalized calorie/protein/water targets with meal, exercise, water, and weight tracking; **Firebase cloud sync** via Google Sign-In and an Android **home-screen widget** for quick status.

ConvertMaster: Developer Tools & File Converter (Web) | *React, Vite, Tailwind CSS*

- All-in-one web app combining **developer utilities with file conversion** in a modern glassmorphism dark UI.

ACHIEVEMENTS & RECOGNITION

- **4x Star of the Month** at Solera Holdings for delivery excellence.

EDUCATION

Bachelor of Engineering (B.E.), Electronics & Communication Engineering

2018 - 2022

GM Institute of Technology, Davangere, Karnataka
